

Dry lining Solutions in the Residential Environment

RIBA Approved CPD

Overview

This CPD will benefit architects looking to improve their knowledge of specifying within the residential sector, particularly acoustic and fire separation between apartments. There will be a focus on junctions with other parts of the building, for example, the façade, concrete columns and risers. The CPD will also reference the relevant approved Documents and building regulations.

Explore the innovative Knauf products that will not only save you time and money, but will also focus on improving the environment.

This CPD will cover:

- Relevant building regulations Part E, Part L, Part M, Part B and Part Q
- Acoustic separation
- Secure by design requirements
- Reverberation control
- Detailing junctions
- Bathrooms and heavy tiles
- Dry screed flooring
- Case studies
